VW/AUDI Airbag Reset

How the Audi-VW Airbag Reset Tool works:

All Audi-VW airbag systems after a car crash and airbag deployment are locked. Even in the event of a small accident the Airbag sensor writes an internal memory special error message "crash data stored" once this data is written to the internal memory you will need to replace the old (very expensive) sensor to new one.

With our Audi-VW Airbag Reset Tool you can reset and repair the airbag computer in your office in under 1

minute. No need to remove the airbag sensor from the car.

Audi-VW Airbag Reset Tool works without additional computer and though your cars OBD II connector can erase the airbag sensor "crash data" or only fault memory.
